- 2000-Today** He looks into the issues of data center, primarily in the area of network and systems monitoring
- 2000-Today** He takes great experience on monitoring systems based on Nagios

Main ICT competences

- Internetworking
- Outsourcing
- Disaster recovery
- Downsizing - Rehosting
- Data Center organization and management

Operating Systems and Platforms with many years of experience

- CICS
- VSE, VM/VSE
- MS-DOS, MS-Windows, NT
- Unix
- Linux and its subsystems (primarily Apache, PHP, Mysql, Samba, etc.)
- TCP/IP
- VMWare
- Nagios and Centreon

Programming languages

- Assembler 370
- Cobol
- Basic
- Clipper
- C/C++
- Java
- PERL
- PHP

Main references

- * Olivetti Italia (1983-1986 with GE.DA.) - Data Center management and technical support (VM/VSE)
- * Alfa Romeo Leasing (1985) - Data Center start up and technical support (VSE)
- * FieraMilano Data (1986-1987) - Technical support for the migration from Bull OS to VM/VSE
- * Pierrel (1987-1995) - System support (VSE)
- * Angst+Pfister (1985-1992) - System support (VSE)
- * Casco Nobel (1988-1991) - Data Center start up and technical support (VSE)
- * CID (1990-1992) - Data Center start up and technical support (VSE)
- * Societa' Autostrade (1992) - Downsizing analysis (MVS -> Unix)
- * Legler Industrie Tessili (1993-1994) - Data Centre start up and technical support (VSE), Outsourcing Project
- * Chiari & Forti (1994) - Batch procedures' documentation (MVS), Outsourcing Project
- * Andersen Software (1994) - CICS optimisation (MVS) for New Holland FIAT Group
- * Banca CRT (1993 with Cap Gemini - Data Center re design (MVS)
- * ENEL (1993 with Cap Gemini) - Disaster Recovery Project
- * SAIPO-L'Oreal (1994-1995) - Outsourcing Project
- * GRUPPO MET (1997-1998) – Project for a voice and data integration of the company frame relay network
- * GRUPPO MET (1998) –Design and implementation of the Company web portal
- * FIMAC Spa (1999) – Design of the whole informatics system – implementation of the migration from AS/400 to Windows NT
- * Faber System (2000) –Advisory and support on LAN and WAN
- * Aonet (2000-2003) – Design of the ICT Enterprise Architecture, ICT systems and networks monitoring (Nagios)
- * Comune di Milano (2005-2007) – ICT Enterprise Architecture, Server consolidation, Ecopass Project, Data Center Monitoring (Nagios)
- * Unichips (2007) – Design and implementation of an integrated monitoring system (Nagios)
- * ATM (2009-2010) – Design and implementation of an integrated monitoring system (Nagios)
- * SLA Watch (since 2011) : design, implementation and governance of the cloud service:SLA Watch with Malabo Srl
- * Pegasus Srl (2012-2013): Design of the ICT Enterprise Architecture, Data Center rationalisation, operational management and support of the whole informatics system
