

CURRICULUM VITAE

Marco Rodolfo Alessandro Bozzetti

Marco is founder and CEO of Malabo Srl (www.malaboadvisoring.it), a consulting company on ICT founded in 2001. Through Malabo, Marco has conducted and conducts consulting activities on ICT for Companies (ICT users and/or providers) and for Public Administrations. Marco worked with growing responsibilities into the leading ICT manufacturing companies, such as **Olivetti** and **Italtel**, and into consulting companies such as **Arthur Andersen Management Consultant** and **GEA / GEALAB**.

From 1995 to 2000, after a selection through headhunters, he was the first **CIO of the whole ENI Group**. In this role he outsourced all the ICT infrastructures of the Group (more than 22 Data Center worldwide) and the ENI owned WAN based on fiber optics, for the rationalization and the cost reduction of the informatics of the Group: at that time, the biggest outsourcing done in Italy and probably in Europe.

The consulting activities, both technical and organizational, have been and are driven by Marco with the primary purpose of aligning ICT with the business requirements so to innovate them through ICT, to rationalize ICT systems, and to generate measurable value for the Customers.

The Marco's main consulting fields include: ICT governance, cyber security, ICT risk analysis and management, business impact analysis (BIA), business continuity plans, design of ICT architectures, rationalization and management of ICT technologies, ICT trend analysis, the value analysis of the ICT, the reorganization of ICT structures and processes with the assessment of skills and roles, the privacy compliance focusing in particular on the recent European GDPR, General Data Protection Regulation.

Since 2009 Marco drives the development of **OAD**, the Observatory on digital attacks in Italy. OAD is a web survey on intentional digital attacks in Italy, that delivers an annual report and ad hoc reports on specific security issues.

In a for a three-year plan since the beginning of 2016, Marco is redesigning and supporting the implementation of the new internal informatic system for the **CNF** (Consiglio Nazionale Forense) and in parallel the implementation of innovative digital services via cloud for the Italian Orders and the Italian Lawyers themselves, with the aim of providing a concrete boost for the digital transformation into the lawyers world in Italy.

Marco has been and still very active in some Italian ICT Associations: he was President and Vice President of Fidalinform, of the SicurForum in FTI, of the ClubTI di Milano, member of the Board of the Innovative Tertiary Group in Assolombarda (Confindustria).

At the present he is **President of AIPSI**, Italian Chapter of ISSA, founder member of FTI, member and account of ClubTI Milano.

Marco gained the following certifications: ITIL v3 and EUCIP Professional Certificate "Security Adviser".

He is Assessor for the European eCF (EN 16234- UNI 11506) and is AICA Certification Commissioner for eCFPlus.

He published more than 200 articles and books on technological evolution, digital security, ICT scenarios.
